Wajid Jafri
Data Architect

Portfolio website: www.SmartCloudDataArchitect.com

9x Oracle Certifications
3x Amazon AWS Certifications
2x Microsoft Certifications

Dear Hiring Manager,

I design databases for performance-critical, Low-latency data platforms in AWS and hybrid environments, especially for Fintech and Hedge funds, where milliseconds, resilience, and data integrity matter.

I have over 16 years of experience managing on-prem and AWS Cloud databases of all kinds.

I am an expert in cloud database migrations, patching, upgrading, query performance tuning, and writing APIs with serverless Lambda functions, with a deep understanding of database internals.

I am proficient in Python, Java, Bash, Terraform, Bitbucket, and CI/CD Pipelines.

I request an in-person interview. Thanks.
